Preface to the Revised and Enlarged Edition xiii
Foreword to the first Edition xv
Preface to the first Edition xvii

Chapter 1: Science and Religion Interface: A Historical Survey 1

1. The Nature of Science, Technology and Religion 1
   1.1. The Nature of Science 2
      1.1.1. Science Demands Empirical Evidence 3
      1.1.2. Testable and Falsifiable 3
      1.1.3. Scientific Ideas are Inconstant and Tentative 4
      1.1.4. Durability of Scientific Knowledge 4
      1.1.5. Limitations of Science 5
      1.1.6. Self Correcting 5
      1.1.7. Science as a Social Activity 5
      1.1.8. Probabilistic Nature of Scientific Explanations 6
      1.1.9. Non-dogmatic Nature of Science 6
      1.1.10. Science is Not a Moral Judge 6
   1.2. Nature of Technology 7
      1.2.1. The Inter-dependence of Science and Technology 8
      1.2.2. The Side Effects of Technology 8
      1.2.3. Control of Technology 9
      1.2.4. Limitation of Technology 9
      1.2.5. Relationship between Technology and Social System 9
   1.3. Nature of Religion 10
      1.3.1. Defining Religion 10
      1.3.2. Dimensions of Religion 11
2. Historical Survey of Science and Religion Interaction 13
   2.1. Harmony Under the Rule of Religion 14
   2.2. The Conflict Thesis 14

2.2.1. Atheists' Use of Science against Faith 16
2.2.2. Scientism 17
3. Possibility of Positive Interaction 20
Concluding Remark 22

Chapter 2: Christianity and Modern Science 23
1. Christian Roots of Modern Science 23
1.1. Church Supported Scientific Research 25
1.2. Christian Faith Encouraged People to Study Science 26
1.3. Science Progressed Under Medieval Christianity 27
1.4. Bible Played an Important Role in Scientific Development 28
1.5. Mathematical God 29
1.6. Nature Operates According to God's Law 31
2. Some Prominent Christian Scientists of Modern Time 31
2.1. Francis Bacon (1561-1626) 34
2.2. John Ray (1627-1705) 35
2.3. Michael Faraday (1791-1867) 36
2.4. George Lemaitre (1894-1966) 39
2.5. Sir John Houghton (1931-2020) 42
2.6. Donald Knuth (b. 1938) 43
2.7. William D. Phillips (b. 1948) 45
2.8. Francis Collins (b. 1950) 46
2.9. Rosalind Wright Picard (b. 1962) 48
Concluding Remarks 49

Chapter 3: Scientific Explanations of the Cosmos 51
1. The Greeks' Geocentric Cosmology 52
1.1. Plato 52
1.2. Aristotle 52
1.3. Eudoxus 54
1.4. Ptolemy 54
1.5. Aristarchus 54
2. Scientific Revolution 55
2.1. Copernicus 57
2.1.1. Heliocentric Cosmology 58
2.1.2. Church Responses 60
2.2. Kepler 61
2.2.1. Kepler's Laws 62
2.2.2. Kepler and the Church 63
2.3. Galileo 63
2.3.1. His Life and Works 64

2.3.2. The Controversial Book 66
2.3.3. The Church's Reaction 67
2.4. Newton 69
2.4.1. His Life and Carrier 69
2.4.2. His Scientific Contributions 70
Concluding Remarks 74

Chapter 4: Scientific Developments in the Nineteenth and Twentieth Centuries 75
1. Charles Darwin and Evolution Theory 75
1.1. His Life 76
1.2. Darwin's Ideological Context 78
1.3. Darwin's Evolution Theory 80
1.4. Christians' Response to Evolution Theory 82
1.5. Neo-Darwin Synthesis 86
2. Albert Einstein and Theory of Relativity 87
2.1. Albert Einstein 88
2.2. What is Relativity? 90
3. Quantum Mechanics 92
Concluding Remarks 94

Chapter 5: Theories of the Origin of the Universe 97
1. Creationism 98
1.1. Scientific Creationism 98
1.2. Biblical Creationism 100
1.3. Scientific Biblical Creationism 101
1.3.1. Young Earth Creationism 101
1.3.2. Old Earth Creationism 101
1.3.3. Theistic Evolutionary Creationism 102
2. Intelligent Design 102
2.1. The Emergence of Intelligent Design 102
2.2. Arguments for Intelligent Design 103
2.3. Intelligent Design Movement – A Scientific Movement 104
3. Big Bang 105
3.1. Expanding Universe 105
3.2. Big Bang Cosmology 107
3.3. Big Crunch 108
4. Black Holes 108
4.1. How to Locate Black Holes? 110
4.2. How They Form? 110
4.3. Supernovae 110
4.4. Quasars 111

5. Steady-State Theory 112
6. Anthropic Cosmological Principle 114
6.1. Models of Apparent Coincidences 115
6.2. Different Types of Anthropic Principles 116
7. Many Worlds Theory 117
8. Kalām Cosmology 119
9. Creation Stories in Hinduism 120
10. Biblical Doctrine of Creation and Creation *Ex Nihilo* 121
10.1. Creation Story in the Bible 122
10.2. Doctrine of Creatio *Ex Nihilo* 123
Concluding Remarks 125

Chapter 6: Philosophy and Sociology of Science 127
1. What is a Philosophy of Science? 127
2. A Brief Historical Survey of the Developments in Philosophy of Science 129
3. Some Prominent Philosophers of Science in the Twentieth Century 133
3.1. Michael Polanyi 133
3.2. Karl Popper 134
3.3. Imre Lakatos 135
3.4. Thomas Kuhn 137
3.5. Paul Feyerabend 138
4. Major Schools in the Philosophy of Science 139
5. What is the Sociology of Science? 140
6. Development of Sociology of Science 141
7. Social Construction of Science 141
Concluding Remarks 143

Chapter 7: Models of Science and Religion Dialogue 145
1. Ian Barbour's Four Model of Science and Religion Dialogue 145
1.1. Conflict 146
1.2. Independence 147
1.3. Dialogue 147
1.4. Integration 148
2. Ted Peter's Model of Interaction between Science and Religion 149
2.1. Scientism 149
2.2. Scientific Imperialism 149
2.3. Ecclesiastical Authoritarianism 149
2.4. Scientific Creationism 150
2.5. The Two-language Theory 150
2.6. Hypothetical Consonance 150

2.7. Ethical Overlap 151
2.8. New Age Spirituality 152
3. Mikael Stenmark's Models of Science and Religion Relations 152
3.1. Initial Proposal 152
3.2. Four Models of Science and Religion Interface 153
3.2.1. Irreconcilability Model 153
3.2.2. Reconciliation Model 153
3.2.3. Independence Model 155
3.2.4. Replacement Model 155
4. Indian Christian Attempts at Science and Religion Dialogue 156
4.1. Job Kohzhamthadam's Contribution to Science and Religion Dialogue 156
4.1.1. Possibility of Constructive Collaboration 157
4.1.2. Nature of the Interaction 158
4.1.3. Future Plan of Action 159
4.2. Kuruvilla Pandukattu's Contribution to Science and Religion Dialogue 159
Concluding Remarks 160

Chapter 8: Some Issues in Science and Religion Relations 163
1. Miracle and Science 163
1.1. What is a Miracle? 163
1.2. The Denial of Miracle 164
1.3. The Possibility of Miracle 165
2. Astrology and Science 167
3. God of the Gap 170

Chapter 9: Ethical Issues in the Genetic Sciences 173
1. The Problem of 'Playing God' 173
2. Bioethics 174
3. Genetic Engineering 176
3.1. The Difference between Genetic Engineering and Traditional Breeding 176
3.2. Applications of Genetic Engineering 177
3.3. Ethical and Theological Issues in Genetic Engineering 178
4. Human Genome Project (HGP) 181
4.1. The Goal of HGP 182
4.2. Ethical Issues Connected with HGP 183
5. Stem Cells Research 184
5.1. Potential Value of Stem Cells Research 185
5.2. Stem Cells Controversy 186

6. Cloning 187
6.1. What is Cloning? 187
6.2. Types of Cloning 188
6.2.1. Therapeutic Cloning 188
6.2.2. Reproductive Cloning 188
6.3. Myths and Facts about Cloning 190
6.4. Ethical and Theological Concerns 191
Concluding Remarks 193

Chapter 10: Violence of Science 195
1. Dams 195
1.1. Dams for Development 196
1.2. Negative Impacts of Dams 197
1.2.1. Impacts on Human Beings 197
1.2.2. Impacts on Environment 199
2. Green Revolution 200
2.1. Positive Result of Green Revolution 201
2.2. Negative Impact of Green Revolution 201
3. Patenting and Bio-piracy 204
3.1. Patent 204
3.2. Bio-piracy 204
3.3. Patent and Bio-piracy Controversy 205
4. Nuclear Power Plants 207
4.1. Nuclear Power Plant Disasters 207
4.1.1. Three Mile Nuclear Power Plant Accident 207
4.1.2. Chernobyl Nuclear Plant Disaster 208
4.1.3. Fukushima Daiichi Nuclear Power Station Disaster 209
4.2. Opposition to Nuclear Power Plants in India 210
5. Bhopal Gas Tragedy 211
Concluding Remarks 212

Chapter 11: Social Studies of Science: Feminist and Postcolonial Perspectives 215
1. Feminist Critique of Science 215
1.1. Exclusion of Women in Science 216
1.2. Discrimination of Women in Science Job 217
1.3. The Androcentric Biases in Science 217
1.4. Western Dualism and Male-Science Superiority 219
1.5. Lack of Recognition of Women's Contribution in Science 219
1.6. Negative Portrayal of Women in Science 220
1.7. A Gender-Free Science 220

2. Postcolonial Studies of Science 222
2.1. Postcolonial Critique of Eurocentric Science 222
2.2. Features of Postcolonial Studies of Science 223
Concluding Remarks 225

Chapter 12: Theological Responses to Science and Religion Dialogue 227
1. Natural Theology 227
2. Theology of Nature 229
3. Process Theology 230
4. Theology of the Created Co-Creator 232
Concluding Remarks 235

Bibliography 237
